

Policy Statement

Terra State Community College (TSCC) will award credit hours for formalized instruction in accordance with the guidelines established by the Higher Learning Commission (HLC), the U.S. Department of Education (DOE) and the Ohio Department of Higher Education (ODHE).

Policy Details

1. In any academic term, one (1) contact hour shall consist of 750 minutes of instructional time within the academic term.
 - a. Typically, students are required to work at out-of-class assignments an average of two hours for every hour of formalized instruction.
 - b. The instructor bears the primary responsibility for formalized instruction, which may be delivered in a variety of modes (aka delivery method).
2. In academic terms of different lengths (below), one (1) contact hour shall consist of the stated number of minutes per week in a learning environment:
 - a. 16-week term: 50 minutes per week
 - b. 14-week term: 55 minutes per week
 - c. 12-week term: 65 minutes per week
 - d. 8-week term: 95 minutes per week
 - e. 6-week term: 125 minutes per week
3. Semester credit hours shall be awarded to students based upon contact hours successfully completed.
 - a. A **credit hour** is the amount of credit awarded for direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks.
 - b. A **contact hour** is the number of hours necessary to equate to a **credit hour**. Credit hours will increase for non-classroom courses such as lab or clinicals as defined in ODHE Directive 2010-16.
4. Hybrid or Distance Learning (Virtual) courses are exempt from the standard calculation. Instead, academic credit (semester credit hours) shall be awarded for these courses based on:
 - a. Academic credit (semester credit hours) awarded for a full-seated (Day, Evening, or Weekend) version of the same course.
 - b. A determination of appropriate award of academic credit by the Curriculum Committee for courses that are offered only in Distance Learning formats.
5. For non-standard Face-to-Face courses (i.e. Hybrid or Virtual): The Curriculum Committee may consult with appropriate offices in determining the credit and contact hours assigned, which may include the Academic Division office, the appropriate Vice President's office, and/or the Office of Institutional Research.
6. Credit hours may be calculated differently for other types of instruction as long as the credit hour calculations align with commonly accepted practices in higher education, the regulations of regional accreditors, and the federal financial aid program. Common accepted practice may be, but are not limited to, the following (adhering to ODHE Directive 2010-16):
 - a. **Classroom** (Lecture): One (1) credit hour shall be awarded for a minimum of 750 minutes of formalized instructional time for a semester.
 - b. **Laboratory** (Lab):
 - i. The preferred configuration for a laboratory component of a course will maintain a two-to-one contact-to-credit ratio premised on the expectation of one additional hour of outside preparation by students.
 - ii. If there is no expectation of (or opportunity for) outside preparation by students, a three-to-one contact-to-credit ratio is permissible.

- c. **Clinical Laboratory Experience:** Credit hours for the clinical laboratory experience will be awarded according to the same formula as laboratory hours.
- d. **Directed Practice:** One (1) credit hour shall be awarded for 4,500 minutes of directed practice instructional time for a semester.
- e. **Practicum:** One (1) credit hour shall be awarded for 6,300 minutes practicum instructional time for a semester. A maximum of nine (9) semester credit hours may be earned in practicum, or any combination of practicum cooperative work experience, over the associate degree program.
- f. **Cooperative Work Experience:** One (1) credit hour shall be awarded for a total of 9,000 minutes cooperative work experience instructional time for a semester. A maximum of nine (9) semester credit hours may be earned in cooperative work experience, or any combination of cooperative work experience and practicum, over the course of the associate degree program.
- g. **Field Experience:** One (1) credit hour shall be awarded for a total of 10,800 minutes field experience instructional time for a semester. A maximum of nine (9) semester credit hours may be earned in field experience, or any combination of field experience, cooperative education experience, and practicum over the course of the associate degree program.
- h. **Observational Experience:** One (1) credit hour shall be awarded for a total of 13,500 minutes observation instructional time for a semester.
- i. **Seminar:** Credit is awarded for seminar hours according to the same formula as that for the lecture course above.

Definitions

<i>Term</i>	Definition
<i>Classroom Lecture</i>	Standard class structure. Commonly referred to as a seminar class.
<i>Clinical Laboratory Experience</i>	Applies only to health programs during which students are assigned to laboratory sections, which meet at a health-related agency rather than an on-campus laboratory facility. Clinical laboratory sessions provide a realistic environment for student learning.
<i>Cooperative Work Experience</i>	On or off-campus paid employment. It augments formal classroom instruction.
<i>Delivery Method</i>	Process through which the course content is conveyed to the students. Could consist of in-person instruction, online delivery, or a combination of both.
<i>Directed Practice</i>	Applies primarily to programs in the health areas during which the student is assigned to practice experiences under constant supervision at an external agency. The student should receive individual instruction and critique in the performance of a function.

<i>Distance Learning</i>	A course design where the students and faculty are not required to meet in person. (aka Virtual)
<i>Field Experience</i>	Planned, paid work activity that relates to an individual student's occupational objectives
<i>Hybrid</i>	A course design combining distance learning and face to face. Interaction between student and faculty is a combination. (aka Blended)
<i>Laboratory Instruction</i>	Educational activity with students conducting experiments, perfecting skills, or practicing procedures under the direction of a faculty member.
<i>Observational Experience</i>	Students participate in an educational experience as observers of practitioners' representative of the occupational area.
<i>Practicum</i>	On- or off-campus experience where students apply theoretical concepts to practical situations within an occupational field.
